

MCB Locking Device

Product code: 9001

MCB lock can be used on all circuit protection devices that have the same toggle type lever as the MCB (RCD's, RCBO's, and isolators in either single pole, double pole, three pole or four pole).

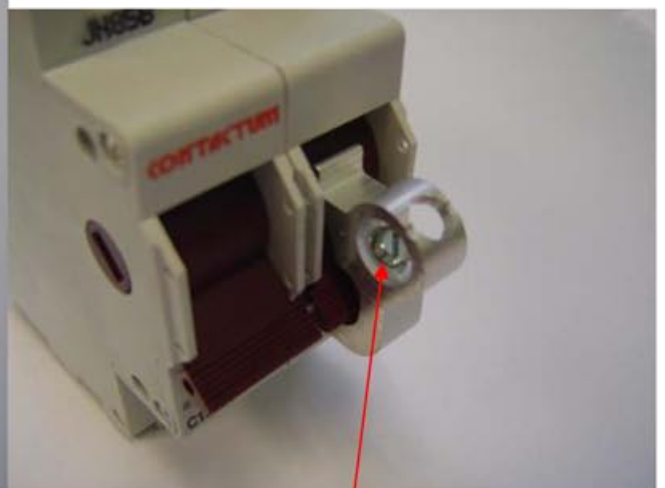

Device can be used to lock the circuit protection device in the on or off position.

To be used in conjunction with a 6mm shackle padlock.

Locking device is attached to the circuit protection device by tightening grub screw which clamps the locking device onto the toggle of the MCB or other device used this prevents the toggle from being switched.

Place padlock shackle through the large hole to lock off the device

Tighten grub screw onto the toggle
