Make The Switch

The IP66 Weatherproof products comprise a robust thermoplastic enclosure and are intended for interior and exterior use wherever water and dust proofing are required.

All products are rated with international protection code IP66 which means that the sealed construction provides protection against the ingress of water and dust. Designed for surface or flush mounting IP55.

The IP66 Weatherproof products need to be fitted with waterproof cables or conduit entries to maintain their IP rating once installed. It offers an easy and safe wall mounting control for equipment such as lighting, bell, garden water pumps etc.
